Features

Piconizer is the first-ever application and corresponding iOS device that allows you to easily and securely shift your photos and videos from the camera roll onto a pocket-sized device that plugs directly into your lightning connector.

The device also includes a microUSB port so you can easily download your photos and videos onto your computer. Use the app to organize and sort through photos and videos while easily making room on your iPhone for new memories.

- Absolutely no PC required to backup photo
- No Hassle, Plug and Use
- No network required
- Security and Privacy, Touch-ID enabled
- Photo Library for iPhone that makes sharing easy

The Video Player

You may copy videos to Piconizer when it's connected to your computer. Drop the videos in the folder "Video" under root directory.

This feature doesn't combine the video to your Photo Library on Piconizer. And it's considered a stand alone video player for playing movies or TV episodes.
